what is acm?

We are one of the largest Computer Science student organization at the University of Texas of Dallas (UTD). We're a team of divisions with one goal – a greater, more collaborative engineering community at The University of Texas at Dallas.

ACM Projects is a semester-long software development program teaching new college students new technologies, instilling core engineering principles like version control and team collaboration. We look for highly motivated students seeking practical experience outside the classroom.

ACM Education helps students learn topics not traditionally taught in classrooms. We run the Mentor Program to pair up students to give them valuable advice and connections. We host the Technical Interview Prep program to help students by reviewing common data structures and techniques. We also conduct workshops on the latest technologies, skills, and languages used in the industry!

ACM Research is a semester-long, research-based initiative for students who want to explore various subfields in computer science. You will be guided by a research lead and a UTD faculty advisor throughout the semester to successfully create a tangible research project.

HackUTD brings together over 875 students from all over the nation for the biggest hackathon in Texas. HackUTD IX in the Fall will be our biggest event yet, where participants will work together for over 24 hours to develop applications and solve real world problems.

acm industry.

ACM Industry hosts companies from the DFW metroplex and beyond to give students an inside view into the industry through technical workshops, mock interviews, and more. As our first division, industry events form the core of the ACM member experience.

acm development.

ACM Development provides students a platform to follow their passion in developing the next generation of software that powers our community to new heights. Using advanced cutting edge new technology, ACM Development will host open session discussions about various technical topics along with guest speakers throughout the semester

acm media.

ACM Media is our newest creative team behind all the marketing and design responsibilities that encompass ACM at UTD. We are a team of designers and marketing specialists to help conduct marketing campaigns and help promote ACM in the UTD campus.

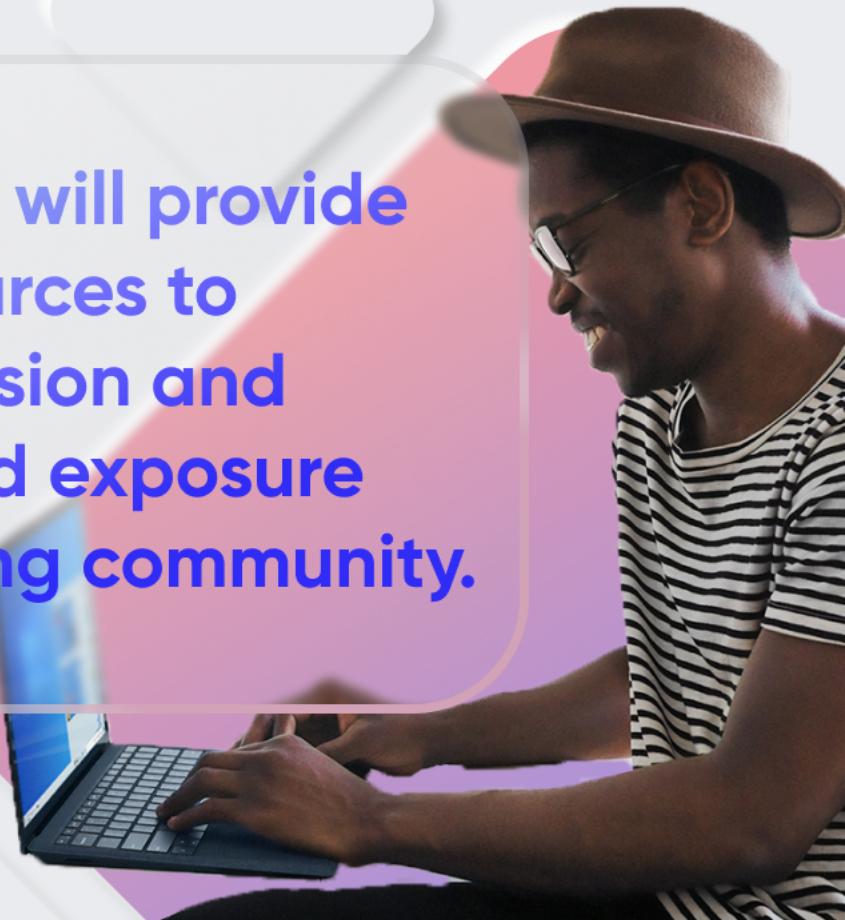

why sponsor?

With a greater collaborative engineering community on the horizon, we are driven to become the largest and most prominent computer science organization at UT Dallas.

Through eight different divisions, we have had the incredible opportunity to teach, mentor, and support some of the brightest students in our community.

Sponsoring ACM will provide us with the resources to continue our mission and give unparalleled exposure to our engineering community.
